

# NAVIGATING THE CHALLENGES AHEAD

As the haulage industry continues to face unprecedented challenges, business owners are invited to an industry roundtable with industry experts, advisors and lenders.

## Key topics will include:

- Getting in front of the curve - running your business more effectively in the new business environment
- Cashflow Constraints - what to do and when to do it
- Talking to your current lenders - why talk, when to talk, what to say

Our aim is to discuss the most pressing and real issues facing the industry and Chatham House Rules will apply.

To enable a full and frank discussion, we would ask that any key issues you want to discuss are emailed to the organisers beforehand.
